ABOUT ME

I consider myself a strong team player with excellent communication skills as well as a detail-oriented and highly driven specialist aspired towards efficient IT solutions, career growth and technology improvement. While working at Schneider Electric, I acquired technical skills and client service expertise that has helped me while working in the IT field. My responsibilities such as project management, setting up meetings, client calls, and general communication, have also translated into strong interpersonal skills. My thirst for knowledge and new challenges drives me to test the limits and keeps me open to a lot of possibilities, while my experience grounds me and allows me to have realistic goals.

As a professional, I have very high standards of work quality for both my team and myself, and I have profound respect for my team's time as well as my own. Adhering to one's deadlines, organization, and the ability to think on one's feet are skills I possess. Outside of work, I enjoy painting digitally, music production, and IT in general, I am constantly hungry for new knowledge which allows me to improve at a pretty fast rate.

You can provide a description of yourself here...
